

ONEwilshire

- **One Wilshire** is connected throughout the world via OC192 internet backbone fiber and interconnects networks via BGP4 via JUNIPER routers. LyncActive has fiber to the PAIX and EQUINIX peering fabrics on the 7th Floor, this is where AOL peers in LA and where you can cross connect to nearly any provider.
- **One Wilshire** is one of the world's most interconnected colocation facilities. Hundreds of networks converge at the corner of Wilshire and Grand at this downtown Los Angeles colocation facility, bringing together networks from nations around the globe. Over the past decade, the 664,000 square-foot building has emerged as the premier communications hub of the Pacific Rim.

WIRED

With tens of thousands of cross-connections, the **One Wilshire** Meet Me Room (MMR) is perhaps the most interconnected space in the entire world.

[\(view magazine article\)](#)

“If this facility went down, most of California and parts of the rest of the world would not be able to connect to the internet. Tour one of the web's largest nerve centers, hidden in an otherwise nondescript office building.”

Detailed brochure on our Datacenter Infrastructure available upon request.
